

=====

A new track in support of graduate student's research

Call for Papers

Doctoral Track of the 47th IEEE Conference on Local Computer Networks
(IEEE LCN 2022)

=====

Hybrid: In-Person and Virtual Conference

(Hosted in **Edmonton, Canada**)

September 26-29, 2022

<http://www.ieeelcn.org>

Scope: The goal of the **Doctoral Track** is to engage graduate students, especially Ph.D. students, that work in the general area of networking to actively participate and contribute to the 47th IEEE Conference on Local Computer Networks (IEEE LCN 2022). The Doctoral Track provides a supportive setting for graduate students to interact closely with established researchers in the field; receive feedback on their research and get advice on managing their research for entering the job market. The Doctoral Track will also help participants to establish a network with their peers in selected areas of computer networks.

The scope of the Doctoral Track of IEEE LCN 2022 includes topics related to theoretical and practical aspects of computer networking. The main author on the submission should be a doctoral student.

The Doctoral track includes two streams: Full papers, and promising ideas. The full papers have 8 pages limit and should address novel contributions to the field. The promising-ideas track encourages submissions that present a novel idea, even if still in the budding phase, aimed at garnering feedback from the research community. This track is limited to 4-page submissions.

Doctoral students are encouraged to consider the maturity and development of their work in selecting either of these tracks. All accepted papers will be published in the IEEE LCN 2022 proceedings.

Papers must be registered on EDAS and submitted in PDF format. Detailed submission instructions are available at the conference website.

IEEE LCN 2022 Important Dates (tentative):

Paper submission: **May 20, 2022**

Acceptance Notification: June 15, 2022

Final camera ready: July 15, 2022

Contact: Direct your questions to the conference chairs:

* General Chair: Lyes Khoukhi <lyes.khoukhi@ensicaen.fr>

* Program Chair: Sharief Oteafy <soteafy@depaul.edu>

* Program co-chair: Eyuphan Bulut <ebulut@vcu.edu>
